### Email

akhilmanoj123@gmail.com

### City/State

Ernakulam, Kerala

### LinkedIn:

linkedin.com/in/akhil-manoj-0b532a194

### GitHub:

github.com/akhilsimonmanoj

## Skills

### Programming Languages

Javascript ES5, ES6+

### Front End Technologies

HTML5, CSS3, React, Redux, Bootstrap, Material

### Relevant Skills

Ajax, JSON, API, Git, Github, JWT, LocalStorage

### Tools

VS Code, Postman

## Certifications

Post Graduate Program in Front End Development at DCT Academy

Pursuing Back End Development at DCT Academy

## Education

### Bachelor's in Engineering

Sambhram Institute of Technology

Year of Graduation: 2019

Class: Second Class

## Languages

English

Malayalam

## Recognitions

- Inter-School Chess Runner-up.
- Awarded Black Belt in Karate.
- Designed and Manufactured an ATV.
- Gold Medal in NSSP (National Scholar Search Programme)

## Hobbies

Photography.

Travelling.

Playing Guitar.

Playing Chess.

# Akhil Manoj

Determined Front End Developer

## Qualification Summary

- Hands on Experience in building Web Applications using React.
- Working with REST APIs.
- Using Redux for Global State Management.
- Reusable Components.
- Best Practices.
- Handle User Authorisation and Authentication.
- Good Understanding on Javascript.

## Projects

### • Billing Management System

Built a Front End React App which generates product invoices by taking customer and product information using User Authentication with JWT and React with Redux for Global State management. The application helps users to add the users and products information with the respective prices and generate the total bill for the items added to the cart.

- Single-Page Application using React JS
- User Authentication Setup using Redux JS
- Multi-User Authorisation using private routes.
- Makes REST API calls using Axios
- Packages Used: React, Redux, formik, yup, react-to-print, react-google-charts.

#### Features:

User can Register an account and Login.

User can add customer and product information with the price.

User can add the items to the cart and generate the bill with the purchase date.

User can download and print the bill.

Search bar to filter the customer, products and bills by name.

User can view the statistics of the sales from the last 7 days.

Back End: <https://github.com/akhilsimonmanoj/Billing-App-Backend.git>

### • Task Box

A front End Single Page React Application to manage tasks and displaying them in a list format for easy view-ability.

Implemented reusable components for inline editing and creation of tasks.

#### Features:

View Tasks in List Format.

Ability to Add, Edit, Remove the tasks.

Saved data using localStorage
